Professional Summary

MERN Full-Stack Developer with hands-on experience building responsive web applications and REST APIs using JavaScript, React.js, Node.js, MongoDB, and Mongoose. Familiar with frontend development, backend API development, database management, authentication, responsive web design, and API testing through personal projects. Strong foundation in problem-solving, object-oriented programming, and web development, with an interest in building reliable and user-friendly applications.

Skills

Programming Languages: JavaScript, Java, Python

Frontend: HTML5, CSS3, React.js, Responsive Web Design

Backend: Node.js, REST APIs, Mongoose, JWT Authentication, CRUD Operations

Databases: MongoDB, MongoDB Atlas, MySQL, SQL

Developer Tools: Git, GitHub, Postman, Render

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, Problem-Solving, API Integration

Projects

TripFinder – Personal Project

Jul 2026

Technologies: React.js, JavaScript, HTML5, CSS3

- Engineered a responsive Trip Advisor-inspired web application using React.js, JavaScript, HTML5, and CSS3 with navigation, search functionality, and destination filters.
- Designed 4 major content sections covering featured destinations, popular hotels, top-rated restaurants, and a hero banner.
- Built 3 user-facing features, including customer reviews, login, and sign-up interfaces.
- Optimized responsive layouts for 3 device categories: desktop, tablet, and mobile.

Task Management REST API – Personal Project

Aug 2025

Technologies: Node.js, MongoDB, Mongoose, REST APIs, JWT, Git, GitHub

- Engineered REST APIs for task management using Node.js, MongoDB, and Mongoose.
- Secured application routes using JWT authentication, implemented user registration and login endpoints, applied bcrypt password hashing, and protected authorized routes.
- Built 4 CRUD operations to create, retrieve, update, and delete task records.
- Modeled User–Project relationships using MongoDB and Mongoose schemas.
- Integrated 3 data-handling features: search, filtering, and pagination.
- Validated and documented REST API endpoints using Postman.
- Deployed the backend on Render with MongoDB Atlas for cloud database hosting.

Education

B.Sc. – Electronics and Communication System

Sastra Deemed to be University

2023–2026

CGPA: 6.1

Certifications

- MERN Full Stack Web Development** – Error Makes Clever
- Complete Web Development Course** – Hitesh Choudhary, Udemy
